

CONTENTS

Special Issue: Electrostatics In Molecular Phenomena

| | |
|--|-----|
| <i>Preface</i> | ix |
| On the underlying source of energetics of bending of hydrogen bonds S. Scheiner (Carbondale, IL, USA)..... | 1 |
| A computational investigation of phosphalkynes: a new building block K. Jayasuriya (Picatinny Arsenal, NJ, USA)..... | 17 |
| Correlations between molecular electrostatic potentials and some experimentally-based indices of reactivity J.S. Murray, T. Brinck, M.E. Grice and P. Politzer (New Orleans, LA, USA) | 29 |
| Rapid evaluation of molecular electrostatic potential maps by simple analytical functions. Application to compounds containing ether-type oxygen atoms O. Kikuchi, K. Horikoshi and O. Takahashi (Tsukuba, Japan) | 47 |
| Molecular electrostatic potential: a tool for the prediction of the pharmacophoric pattern of drug molecules S. Guha, D. Majumdar (Calcutta, India) and A.K. Bhattacharjee (Shillong, India)..... | 61 |
| Development of quantitative methods for studying electrostatic complementarity in molecular recognition and drug design P.M. Dean, P.-L. Chau and M.T. Barakat (Cambridge, UK) | 75 |
| Cumulative multicenter multipole moment databases and their applications W.A. Sokalski (Wroclaw, Poland) and A. Sawaryn (Lübeck, Germany) | 91 |
| Protein electrostatics on personal computers G.G. Ferenczy, J.G. Ángyán, T. Koritsánszky, J. Nagy and G. Náray-Szabó (Budapest, Hungary) | 113 |
| Similarities between the effects of configurational changes and applied electric fields on the shape of electron densities G.A. Arteca and P.G. Mezey (Saskatoon, Sask., Canada) | 125 |
| Modelling of ion–ligand interactions in solutions and biomolecules J. Åqvist (Uppsala, Sweden) | 135 |
| An electrostatic enzyme–substrate recognition: the case of Cu,Zn superoxide dismutase A. Desideri (Messina, Italy), F. Polticelli and M. Falconi (Rome, Italy) | 153 |
| A theoretical study of the resonance effect by means of the NH ₂ group J. Catalán, F. Fabero and J.L.G. de Paz (Madrid, Spain) | 161 |
| The molecular electrostatic potential and drug design G. Pèpe, D. Siri and J.-P. Reboul (Marseille, France) | 175 |
| The role of electrostatics in solute–solvent interactions with the continuum G. Alagona and C. Ghio (Pisa, Italy) | 187 |
| Electronic and electrostatic aspects of carbonic anhydrase inhibition by sulphonamides M.C. Menziani, M. Cocchi and P.G. De Benedetti (Modena, Italy) | 217 |
| Electrostatics in quantitative structure–activity relationship analysis P.G. De Benedetti (Modena, Italy) | 231 |
| Methods for determining the reliability of semiempirical electrostatic potentials and potential derived charges C.A. Reynolds (Colchester, UK), G.G. Ferenczy (Vandoeuvre-les-Nancy, France) and W.G. Richards (Oxford, UK) | 249 |
| Intra- and extra-molecular electrostatic potentials in vitamin C M. Eckert-Maksić, Z.B. Maksić (Zagreb, Yugoslavia), M. Hodošek (Bethesda, MD, USA) and K. Rupnik (Baton Rouge, LO, USA) | 271 |

| | |
|---|-----|
| Complete or partial comparison of molecular electrostatic potential distributions? Some tests with 5-HT ligands F. Sanz, F. Manaut, T. Dot and E. López de Briñas (Barcelona, Spain)..... | 287 |
| Electrostatic forces and the structural stability of a modelled bacteriophage T4 glutaredoxin fold: molecular dynamics simulations of polyglycine 87-mers. O. Nilsson and O. Tapia (Uppsala, Sweden) | 295 |
| <i>Author Index</i> | 315 |
| <i>Subject Index</i> | 317 |
